

## **Company Safety Policy – H&S Arrangements**

### **Head of Company**

The CEO of Williams Environmental Ltd has overall responsibility for health and safety within the company, and will:

- Ensure suitable financial provision is made for health & safety obligations.
- Provide appropriate information and instruction to employees.
- Ensure work is planned to consider health & safety issues.
- Ensure that staff at all levels receive appropriate training.
- Monitor and assess risk to health and safety.
- Understand the company policy for health and safety and ensure it is readily available for employees.
- Set a personal example when visiting site by wearing appropriate protective equipment.
- Actively promote at all levels the company's commitment to effective health and safety management

### **Health and Safety Co-ordinator / Representative**

The persons responsible for H&S are Stephen Robinson and Dave Foster.

Health and Safety Experience /qualifications of above persons are NEBOSH National General Certificate in Occupational Safety and Health and IOSH Managing Safely, respectively. J Fisher (Operations Director) and M Price (Technical Director) are also in possession of current NEBOSH certificates.

The Health and Safety Advisor / Representative will undertake and be responsible for:

- Monitoring the implementation of the health and safety policy throughout the company and reviewing its appropriateness by regular safety audits/inspections carried out in various workplaces.
- Investigating accidents and implementing corrective action
- Reviewing health and safety legislation and implementing any new requirements pertaining to the company's undertaking
- Liaising with managers, employees, sub-contractors and specialists as and when appropriate
- Collating and reporting any accidents reportable under the Reporting of Injuries, Diseases and Dangerous Occurrences Regulations (R.I.D.D.O.R.) 2013.

## **Employees**

In order for all employees to comply with their legal duties, they will undertake and be responsible for:

- Reading and understanding the Company's health and safety policy and carry out their work safely and in accordance with its requirements.
- Ensuring that all protective equipment provided under a legal requirement is properly used in relation to any instruction / training given and in accordance with this health and safety policy.
- Reporting any defects to work equipment immediately to the Site Supervisor
- Reporting to the management any incidents, which have led or might lead to injury or damage.
- Reporting any accidents or near misses however minor to the Site Supervisor
- Using the correct tools and equipment for the job in hand and in accordance with training and instructions
- Co-operating with any investigation, which may be undertaken with the objective of preventing reoccurrence of incidents.

## **Communication/Consultation**

The company will communicate and consult with all employees on the following issues:

- The content of this policy
- Any rules specific to a site or job
- Changes in legislation or working best practice.
- The planning of Health and Safety training
- The introduction or alteration of new work equipment or technology

This communication and consultation will take place directly with the employees via regular safety meetings, toolbox talks, e-mails and memos posted on the staff notice board.

## **Training**

All employees are given training appropriate to their responsibilities. Training will be provided for the following situations:

- Induction training for new employees (Health and safety awareness, company procedures etc)
- The introduction or modification of new/existing machinery or technology
- A change in employee position/work activity or responsibility.

Training is also specifically provided for work with hazardous substances, use of PPE and manual handling. Any training provided by the company will be formally recorded with a hard copy kept on file.

A programme of refresher training will be undertaken to keep employees up to date with legislation and industry best practice.

### **Emergencies**

It is the Company's policy to take account of fire hazards in the workplace. All employees have a duty to conduct their operations in such a way as to minimize the risk of fire. This involves compliance with the Company's no smoking policy, keeping combustible materials separate from sources of ignition and avoiding unnecessary accumulation of combustible materials. Site Supervisors are responsible for keeping their operating areas safe from fire, ensuring that their staff are trained in proper fire prevention practices and emergency procedures.

#### **ACTION TO BE TAKEN UPON DISCOVERING A FIRE**

- Do not try to tackle the fire yourself (unless trained to do so)
- Activate the nearest fire alarm to raise the alarm.
- Leave the building by the nearest fire exit and proceed to the muster point.
- Do not re-enter the building for any purpose until the all-clear has been given.

#### **ACTION UPON HEARING THE FIRE ALARM**

- Stop working and calmly leave the building by the nearest fire exit.
- Go directly to the muster point and await instructions.
- Do not leave the muster point until the all-clear is given.
- Do not re-enter the building for any purpose until the all-clear is given.

### **Staff Welfare**

Wherever possible arrangements will be made with the Client and/or Principal Contractor for the use of Welfare facilities at sites under their management. As a minimum the following requirements will be adhered to:

- Toilet/washing facilities accessible on site.
- Eating/rest facilities accessible on site

Where these facilities are not provided by the Client or Principal contractor, the company will provide suitable welfare facilities.

### **Occupational Health Surveillance**

All staff involved in site operations i.e., Loading and unloading of material, manual handling, contact with hazardous material will be required to attend routine medical examinations with the company doctor to determine that their duties are not having any detrimental effect on their health. The frequency of the medical examinations will be determined by the Occupational Health Advisor, the results of these medical examinations will be confidential and only viewed by senior management to determine the wellbeing and continuing suitability for the employee to continue in his or her current role. These records will be securely retained for the life of the site.

Occupational Health Surveillance is carried out in addition to existing Health and Safety practices.

### **Work Equipment**

All work equipment (including electrical equipment) used at work, as part of the Company's undertaking will comply with the Provision and Use of Work Equipment Regulations (P.U.W.E.R.).

Before new equipment is introduced into the working environment, an assessment will be made by: General Manager and Health & Safety Advisor, in order to ascertain that the equipment is suitable for its intended use.

No employee will use work equipment for which they have not received specific training.

No employee will knowingly misuse work equipment or remove any guards that are in place to minimise a specified risk.

All work equipment will be maintained and inspected at suitable intervals either internally by a competent person or by specialist external companies. The frequency of work equipment maintenance or inspection will be based on manufacturer's guidance and industry best practice. Any maintenance / inspections undertaken on company equipment will be formally recorded with a hard copy left on file.

If any faults or damage are found on any equipment, stop using the work equipment and report the fault to your supervisor.

### **Personal Protective Equipment (PPE)**

Appropriate personal protective equipment will be issued to employees as and when necessary for work activities.

Training will be provided for employees on the safe use, storage and maintenance of the relevant equipment before issue, and a written record detailing what PPE has been issued will be signed by the employees on receipt of the equipment and the hard copy kept on file.

Employees have a legal duty to wear PPE as specified in relevant site rules, risk assessments and method statements.

Any defects or malfunction of PPE must be reported to the Yard Manager.

### **First Aid and Accident Reporting**

Adequate first aid provision will be made at every place of work occupied by the Company.

Each first aid box shall be suitably marked and be easily accessible to all employees at all times when they are at work.

On Project Sites – Wherever possible arrangements are made with clients/clients/principal contractors to use their first aid facilities. Where this is not possible, a member of the project team will be nominated as the appointed person for first aid and a first aid box supplied, which will contain adequate supplies for the total number of employees on site.

Head Office – The first aid box is located at reception.

Riverside Industrial Estate. Oliver Road, West Thurrock, Grays, RM20 3EF.

Williams Environmental Limited is registered in England No 07907671

Registered Office: Suite A, First Floor. Unit 1. The Eurogate Business Park. Ashford. Kent. TN24 8XW

The Qualified First Aiders – Fraser Cutting, Dave Foster and Lloyd Lonergan  
The Appointed Persons, should the First Aiders be unavailable – Janice Fisher and Mike Price

All accidents MUST be reported to your Site Supervisor and the details recorded in the accident book (held at head office). Serious accidents where hospital treatment is required must be reported to the Health and Safety Advisor as soon as possible after the incident.

Reporting of Injuries, Diseases and Dangerous Occurrences Regulations (R.I.D.D.O.R.):

Certain accidents are reportable to the HSE's Incident Contact Centre. The Health and Safety Co-ordinator must be notified within 15 days of any incidents causing the following injuries:

- any work-related injury that leads to an employee being absent from work for more than 7 working days
- fracture other than to fingers, thumbs or toes.
- Amputation.
- dislocation of the shoulder, hip, knee or spine.
- loss of sight (temporary or permanent).
- chemical or hot metal burn to the eye or any penetrating injury to the eye.
- injury resulting from an electric shock or electrical burn leading to unconsciousness or requiring resuscitation or admittance to hospital for more than 24 hours.
- any other injury: leading to hypothermia, heat-induced illness, or unconsciousness; or requiring resuscitation; or requiring admittance to hospital for more than 24 hours.

All accidents / incidents will be investigated by senior management and/or the Health and Safety Co-ordinator / Representative with the following objectives.

- To determine the cause(s) with a view to preventing a recurrence
- To gather information for use in any criminal or civil proceedings
- To confirm or refute a claim for industrial injury benefit.
- To prepare notification to be made to the Health and Safety Executive

The degree of investigation will be dependent on the seriousness of the accident. The aim of the investigation will be to seek to answer the following questions.

- WHAT caused the accident?
- WHO was involved?
- WHEN did it occur?
- WHY did it occur?
- HOW could it have been prevented?
- HOW can a recurrence be prevented?

### **Hazardous Substances (COSHH)**

Before any hazardous substances are used during a work process, a material safety data sheet (MSDS) will be requested from the supplier and an appropriate assessment made of the risks from that substance will be undertaken by the Health and Safety Co-ordinator / Representative, in line with the Control of Substances Hazardous to Health Regulations (COSHH). Alternative less harmful substances will be used wherever possible.

Assessments will consider storage, handling, aspects of use, exposure, PPE requirements, workers health, and emergency actions. Supervisors will brief staff on any hazard or substance precautions, with written records being in an accessible location within each department.

An inventory of all substances and materials hazardous to health is held at head office.

### **Company Vehicles**

The use of company vehicles will be in accordance with company procedures for cars and in accordance with FORS manual for commercial vehicles.

### **Manual Handling**

Manual handling operations will be risk assessed to determine suitable control measures for the management of risk and the company will endeavour to eliminate manual handling operations where practicable with any remaining risks being controlled by;

- reducing weights
- reducing the frequency of manual handling
- the use of additional manpower
- through the provision of suitable equipment to assist in the operation
- the selection of persons to carry out manual handling or lifting tasks will be based on the training given, age, physique etc.

### **Co-operation and Coordination**

Employees will always familiarise themselves with client procedures when first attending site, in particular general site access, emergency procedures and high-risk work activities including permit to work systems. Client's site procedures and specific instructions will be always followed.

Before commencing work, the site supervisor will attend any site meetings or inform other trades working in the direct vicinity of the activities of the company of the specific risks and requirements of the work being undertaken.

### **Risk Assessments**

The Health and Safety Co-ordinator / Representative will carry out and record formal risk assessments. In addition, risk assessments are carried out continuously by employees throughout their work. Hazards are considered and work methods established to minimize the risk of injury to themselves, and others affected by the work. Where the employee does not have sufficient knowledge about a specific hazard, such as work in confined spaces, they will take further advice from the H&S Co-ordinator / Representative if required. The head of the Company ensures operators are provided with appropriate instruction and training on risk assessments.

### Policy review

This policy will be kept up to date, particularly as the business changes in nature and size. To ensure this, the policy and the way in which it has implemented will be reviewed every year. In addition, reviews of risk and COSHH assessments and site safety inspections etc will take place from time to time.

### Employee awareness of H & S Policy and Arrangements.

When employees join the company, all employees will be made aware of the existence of the policy and will read the policy statement. They will also be made aware of:

- how to report an accident
- what to do in the event of fire or emergency
- informed of who their first aiders are.

Confirmation that they have understood what they have read or have been told should then be sought. This procedure will be carried out by a senior member of staff with the assistance of an experienced staff representative.
